

COLEMAN METTS, C.A.S.

Production Sound Mixer

Member, IATSE 695

Coleman Metts has worked as a Production Sound Mixer for twenty years. His diverse experience has had him working in difficult and unique situations including in the open ocean on a paddle board for director and star Helen Hunt. Coleman's early work includes the cult classic feature *Donnie Darko* starring then up and coming talents Jake and Maggie Gyllenhaal. With an easy-going style, Coleman prides himself on recording the best sound possible and loathes the concept of "fixing it in post." Going back and forth between features and television, Coleman is an active member in the Cinema Audio Society and is Los Angeles based.
