Los Angeles based Teri Whittaker brings a sense of humor with her on all her jobs, be it commercials, music videos, films or web series. Her love of 70's and 80's kitsch props sets the tone for some of her favorite work, though she prides herself on making her work look and feel real but with added twists. "I really enjoy setting the scene. I want you to feel you are in a real place, that you have entered this person's world with all their personality visually laid out." Teri's music videos have earned her a Grammy win, and MTV and MVPA Award nominations. Her work with visual effects teams seamlessly marry live action with post visual effects and her team player hands on approach and problem solving abilities are a winning combination.
